WORK EXPERIENCE

Apollo Chain

Front-End Developer

Canada - Vietnam

November 2021 – Present

- Generate landing page of an NFT gaming platform, which is a project developed by Apollo Chain's team. The landing page is standardized by Next.js and Tailwindcss, both of which are superb in order to make a well performing web app experience for users.
- Collaborate with senior management including marketing lead to grow Telegram and Discord community, implementing posting schedules for popular content which increased members up to 10k+
- Collaborate with UX/UI and game development teams to generate ideas for designs of gameplays, marketplace and NFT items, along with discussing with CTO of strategies in regards to direct users in using the project's landing page in most effective manners
- Utilize Backlog by Nulab, a Scrum agile development methodology to plan out sprints from Product Backlog Items, and implement specific sprints, review closed sprints and do daily scrum every morning with the team

Freelancing

Full Stack Developer

Toronto, ON

April 2018 – Present

- Create and maintain fast, beautiful, responsive and SEO friendly websites (Next.js, Express.js, React)
- Develop microservices that are reliable, efficient and scale well (Node.js, Express.js)
- Translate UX/UI wireframes to visual elements
- Collaborate with various development and design teams by using Monday.com or Trello

Code PXL

Front-End Developer

Toronto, ON

January 2017 - March 2018

- Implemented websites, mobile applications, and landing pages from concept through deployment
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Assessed UX and UI designs for technical feasibility
- Collaborated with product team members to implement new feature developments through JIRA agile methodology

PERSONAL QUALIFICATIONS

- Have sharp attention to detail and openness to critique through code and design reviews
- Team player and strong communication skills
- Ability to work cross-functionally for technical collaboration with other teams
- Have an eye for design and be confident to translate a good design into code
- Being resourceful and solving problems
- Work across all phases of the software development lifecycle (planning, design, implementation, deployment, operations, and support)
- Have a passion to define and drive engineering initiatives to improve scalability, reliability and quality
